DETAILED ACTION

Election/Restrictions

1. Claims 1-24 are pending in the application.
2. Applicant's election of Group I in the reply filed on March 27, 2007 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
3. Applicant is entitled to have the method claims (Groups VIII and XV), which are commensurate in scope with the elected invention, rejoined if the compounds of Group I are allowed.
4. Applicant reserved the right to file a divisional application to the non-elected subject matter.
5. An action on the merits on Claims 1-4, 6, and 9-19 is contained herein.

Claim Objections

6. Claim 6 states "coompound" instead of compound. Correction is required

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 1-4, 6, and 9-19 are rejected on the ground of nonstatutory double patenting over claims 1-3 and 21-24 of U. S. Patent No. 7,160,875. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims overlap in claimed subject matter. The compound, of example 186, in the instant application is also embraced by U. S. Patent No. 7,160,875. The overlap exist when in the instant case R^1 is

(structure a) and R^2 is a cycloalkyl substituted by phenyl and two fluoro groups.
